

IN THE CLAIMS:

This listing of claims will replace all prior versions, and listings, of claims in the application:

1 – 14. (Cancelled).

15. (Currently Amended) Process for visual display of information with a bar graph performed in a motor vehicle with an electronically controllable display, where the display is controlled in such a manner that at least two sets of information, having an interrelated effect, are displayed at the same place alternating with the same type of graphics, but with different labels, wherein a graphical comparison difference between said at least two sets of information is representative of a third set of information, and wherein said at least two sets of information are selected from the set that includes ~~list consisting of~~: a distance range said motor vehicle can travel before exhausting an amount of fuel in said motor vehicle, ~~and~~ a distance said motor vehicle has to travel to reach an entered destination, an average fuel consumption of said motor vehicle, a current fuel consumption of said motor vehicle, an amount of fuel in said motor vehicle, ~~and~~ a distance range said motor vehicle can travel before exhausting said amount of fuel, a total travel time and a time traveled.

16. (Cancelled).

17. (Previously Presented) Process as claimed in claim 15, wherein the information is displayed in different colors or intensity of illumination (light/dark).

18. (Cancelled).

19. (Currently Amended) Indicator for visual display of information with a bar graph incorporated into a motor vehicle with an electronically controllable display, comprising means to control the display in such a manner

that at least two sets of information, having an interrelated effect, are displayed at the same place alternating with the same type of graphics, but with different labels, wherein a graphical comparison difference between said at least two sets of information is representative of a third set of information, and wherein said at least two sets of information are selected from the set that includes—list consisting of: a distance range said motor vehicle can travel before exhausting an amount of fuel in said motor vehicle, a distance said motor vehicle has to travel to reach an entered destination, an average fuel consumption of said motor vehicle, a current fuel consumption of said motor vehicle, an amount of fuel in said motor vehicle, ~~and~~ a distance range said motor vehicle can travel before exhausting said amount of fuel, a total travel time and a time traveled.

20. (Cancelled).

21. (Previously Presented) Indicator as claimed in claim 19, wherein the information is displayed in different colors or intensity of illumination (light/dark).

22 – 35. (Cancelled).

36. (Currently Amended) Process as claimed in claim [[35]] 15, wherein said third set of information relates to whether said amount of fuel is enough to reach the entered destination.

37. (Cancelled).

38. (Currently Amended) Process as claimed in claim [[37]] 15, wherein said third set of information relates to whether the average fuel consumption is increasing or decreasing.

39. (New) Indicator as claimed in claim 19, wherein said third set of information relates to whether said amount of fuel is enough to reach the entered destination.

40. (New) Indicator as claimed in claim 19, wherein said third set of information relates to whether the average fuel consumption is increasing or decreasing.
